Health, Safety, and Environmental Leadership

Organizations face increasing health, safety and environmental (HSE) risks and liabilities. This workshop was developed to help build HSE competencies for persons assigned front line leadership roles in private or public organizations (managers, supervisors, HSE professionals and members of Health and Safety Committees).

This workshop will provide you with an improved understanding about best practices in HSE leadership. It will assist your organization along its "Journey Toward Zero Harm", by reducing workplace injuries/losses, improving overall HSE performance, reducing legal exposure and achieving improved financial returns.

Presenter:
Pat Bolger,
MSc, BSc, CEA
35 years health, safety,
and environmental
leadership and
management
experience in industry,
government and
consulting.

Friday, March 12 • 8:30 AM - 4:00 PM • North Bay

Topics to be Covered

1. **What is your organization's HSE culture?**
2. **Influencing safe and responsible behaviour**
3. **Understanding responsibility perspectives ("Sustainability", "Corporate Social Responsibility", "Internal Responsibility System" and "Due Diligence")**
4. **Addressing the accountability gap**
5. **Developing effective two-way communication**
6. **Developing competencies and building a learning organization**
7. **Establishing a risk-aware workforce**
8. **Mechanisms for addressing change**
9. **Addressing the root causes of incidents**
10. **Applying systems leadership principles - implementing a HSE Management System**

Safety professionals seeking to maintain their CRSP Certification can apply 0.5 CMP's (BCRSP Approval # 09158)

Registration: \$280 + GST
